Aksorn English Program

Designed for Thai EP/MEP classrooms

A complete learning solution to promote subject learning, future-ready skills, and English proficiency.

Built for Thai EP/MEP Classrooms
Content and activities designed specifically for Thai learners with real classroom relevance.

Curriculum – Aligned
Fully aligned with Thailand's Basic Education Core Curriculum, covering all learning standards and indicators.

Complete Learning Solution
A full learning package in one book including content, exercises, activities, assessments, and digital resources.

English Language Development
Enhances communication skills, language exposure, and confidence to help students achieve more in English.

Active Learning
Engaging activities that encourage participation, collaboration, and critical thinking.

Real-world Contexts
Topics and tasks connected to real-life situations and the world around learners.

Skills Development
Develops essential 21st century skills for academic success and lifelong learning.

Digital Resources
Digital tools and resources that enhance learning anytime, anywhere.

Teacher Support
Practical and ready-to-use resources for professional support.

Empowering teachers
Inspiring students
Enriching English Program

NEW RELEASES!

Targeting Mathematics

Work-Textbook

Unlocks the power of mathematics with engaging activities using the Concrete, Pictorial, Abstract (CPA) approach and Bar Modeling from Singapore Mathematics.
Boosts students' skills and confidence in mathematics like never before!

This series aligns with Thailand's Basic Education Core Curriculum B.E. 2560 (Revised edition of B.E. 2551).

Free! Teacher's Resources — Answer Key, Lesson Plan, Active Learning, Exam Questions (NEW)

New Series!

think! Math

Work-Textbook

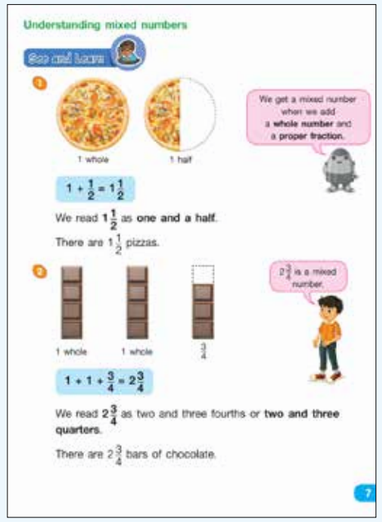

Builds students' calculation ability for mathematical literacy through engaging activities using the Concrete, Pictorial, Abstract (CPA) approach from Singapore Mathematics.

Goes beyond procedural practice by developing deep conceptual understanding and problem-solving skills through real-life contexts, active learning activities, and non-routine tasks. Enables students to think critically and approach unfamiliar problems with confidence.

This series aligns with Thailand's Basic Education Core Curriculum B.E. 2560 (Revised edition of B.E. 2551).

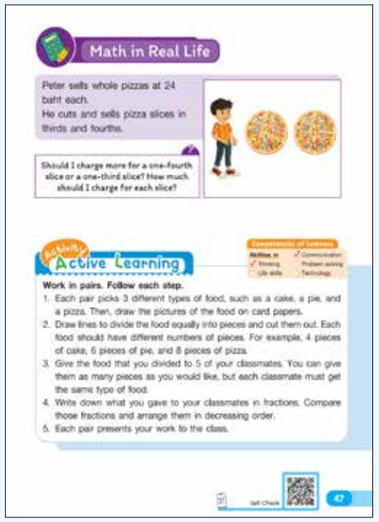

Free! Teacher's Resources — Answer Key, Lesson Plan, Smart PowerPoint, i-Math

Enhances conceptual understanding with the **Concrete, Pictorial, Abstract (CPA)** approach and **Bar Modeling** from the renowned **Singapore Mathematics.**

Students connect **mathematics to real life through active learning activities,** building competencies to apply mathematical thinking and solve real-world problems beyond the classroom.

Engages students from the start of each chapter through familiar **real-life situations,** guiding them to explore ideas, share different ways of thinking, and develop mathematical concepts naturally.

Incorporates problem solving as the core of learning. Engages students in non-routine tasks that promote **higher-order thinking, problem-solving, communication, and real-world applications.**

Designed Around the 5Es Learning Cycle

Engage

Spark curiosity and connect to real life.

Explore

Explore and investigate through hands-on activities.

Explain

Learn key concepts with clear explanation and visuals.

Elaborate

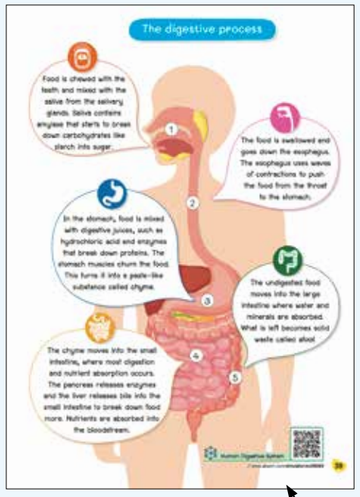

Apply knowledge and extend learning for deeper understanding.

Evaluation

Assess understanding and track learning progress.

Clear, student-friendly content and graphics connected to daily life help enhance students' understanding.

Guiding Questions at the start of each unit, before experiments, and in the unit content encourage students to think, connect prior knowledge, make predictions, and build deeper understanding.

Extension and Media QR Code offer extra knowledge and access to digital learning media related to the lesson topic.

Activities and assessments engage students through hands-on experiments, classroom tasks, and beyond-classroom learning, while evaluating their understanding through Practice and Unit Tests.

Enhance Science Learning with Digital Tools

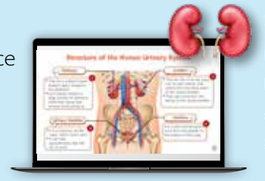

Engaging digital resources that extend learning beyond the classroom, enrich understanding, and support every learner.

*Access on onlearn.aksorn.com

Simulation

Transforms learning experience to the next level beyond the classroom with personalized activities and real-time feedback.

*Access on onlearn.aksorn.com

Smart PowerPoint

Upgrades and brings your lessons to life with interactive content, challenging questions and quizzes.

*Access on onlearn.aksorn.com

Interactive 3D

Engages students more with manipulative 3D elements to enhance learning experience.

Vocabulary

Provides important words and their meanings in Thai language.

NEW

New Revised edition for Primary 1-6

Active learning

Targeting Computing Science

Work-Textbook

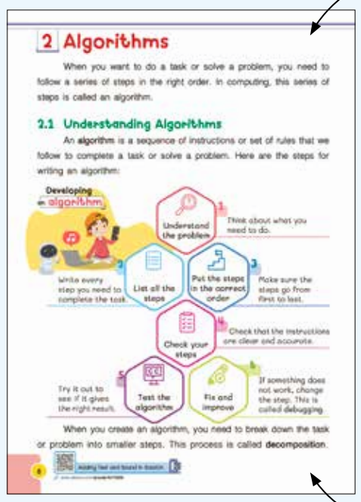

Takes students on an exciting journey, from understanding basic computing concepts to coding and programming.
This series develops computational and algorithmic thinking skills, enabling students to solve problems effectively while building essential digital literacy skills for the 21st century.

This series aligns with Thailand's Basic Education Core Curriculum B.E. 2560 (Revised edition of B.E. 2551).

Free! Teacher's Resources: Answer Key, Lesson Plan (NEW), Clip (NEW), Digital Media (NEW), Smart PowerPoint (NEW), Exam Questions (NEW)

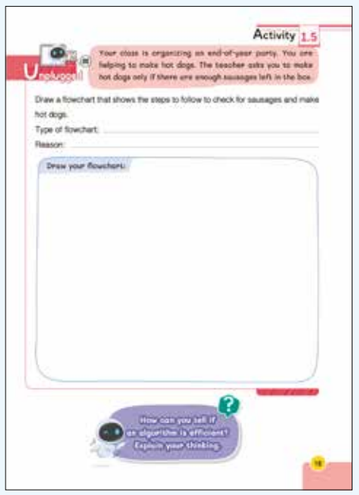

The content focuses on developing **computational thinking and logical reasoning skills** to solve everyday problems.

Active learning activities provide **hands-on practice** and guide students step by step in using programs and technology.

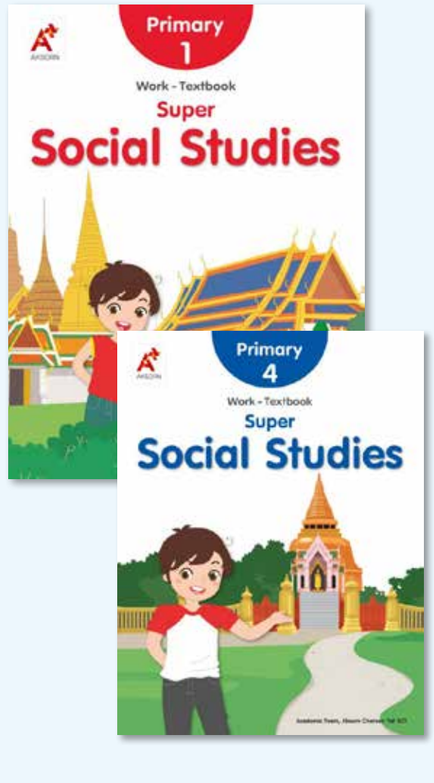

The teaching approach emphasizes the **basics of technology use and digital media literacy.**

The series features a variety of **digital learning resources,** such as i-Learn, video clips, games, and Smart PPT, to support an engaging and effective learning environment.

Active learning

Super Social Studies

Work-Textbook

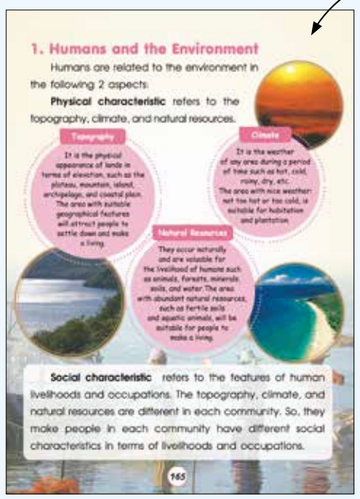

Motivates students to explore a wide range of social studies topics to better understand human beings as individuals and members of society.
This series develops problem-solving and 21st century skills and enhances geo-literacy through engaging activities and exercises.

This series aligns with Thailand's Basic Education Core Curriculum B.E. 2551 (A.D. 2008).

Free! Teacher's Resources: Answer Key

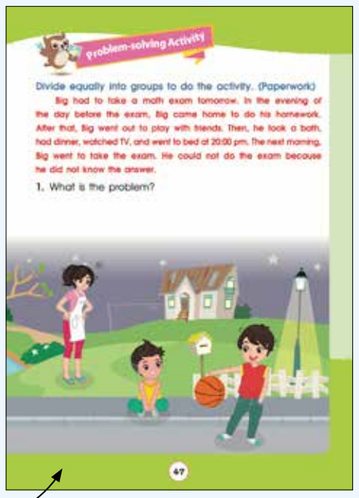

The content presents **key concepts through clear and engaging infographics,** making learning easier to understand and remember.

Engaging activities promote **21st century skills, problem-solving, and project-based learning,** helping students think critically, work together, and apply knowledge to real-life situations.

The lessons encourage **collaboration and ICT skills** through active tasks that allow students to work together and use technology meaningfully.

Real-world scenarios connected to students' lives and society make learning meaningful and relevant.

Active Learning

Targeting Health and Physical Education

Work-Textbook

Guides students in building a strong foundation for a healthy lifestyle for individuals, families, and communities.
This series develops essential life skills through a variety of age-appropriate physical activities.

This series aligns with Thailand's Basic Education Core Curriculum B.E. 2551 (A.D. 2008).

Free! Teacher's Resources: Answer Key, i-Learn (NEW), Smart PowerPoint (NEW), Lesson Plan (NEW), Interactive 3D (NEW), Vocabulary (NEW)

Opening cartoon strips and thought-provoking questions encourage students to think critically, discuss ideas, and connect learning to **real-life situations.**

The **content links learning** to everyday life, making key concepts easier to understand. Furthermore, **additional content boxes** provide clear explanations that extend knowledge and deepen understanding.

The series features a variety of **digital learning resources,** including i-Learn and Smart PPT, and supports engaging classroom instructions and effective learning.

Exercises and Active Learning activities help students review key concepts and practice skills through hands-on learning.

NEW

Active Learning

Targeting Art

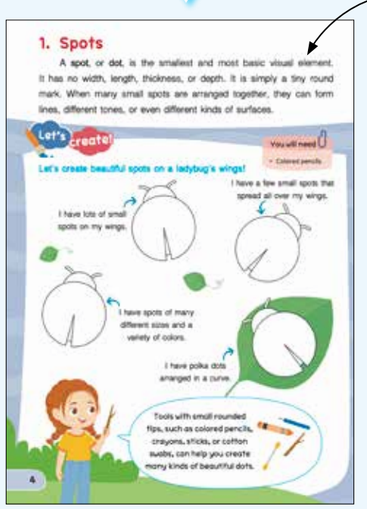

Work-Textbook

Opens the inspiring world of art and encourages young artists to explore, create, and express their ideas through meaningful art experiences and hands-on activities.
This series develops artistic skills, creativity, and appreciation of art, helping learners understand the value of art in everyday life, culture, and society.

This series aligns with Thailand's Basic Education Core Curriculum B.E. 2551 (A.D. 2008).

Free! Teacher's Resources: Answer Key, Lesson Plan, i-Learn, Smart PowerPoint

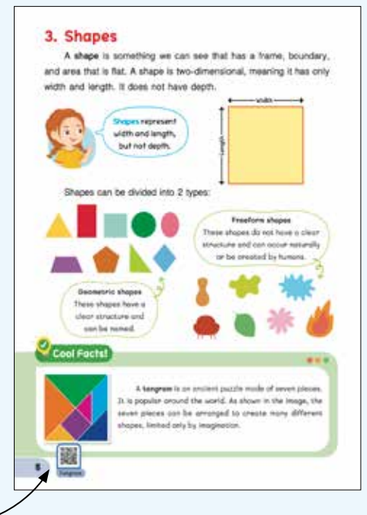

The content focuses on enriching students' **artistic experiences, developing art skills,** and building an understanding of the **value of art.**

Active Learning activities provide opportunities for students to practice a variety of art skills and expand their imagination through creative tasks.

The series features a variety of **digital learning resources,** including i-Learn and Smart PPT, to support an engaging and effective art learning environment.

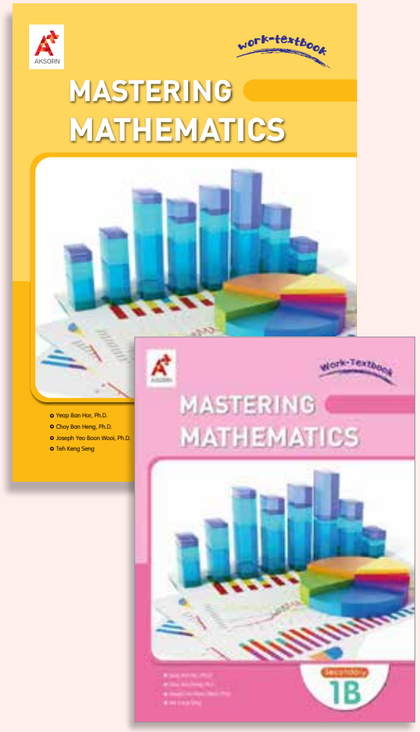

The lessons present **art through everyday objects, nature, and culture,** helping students see the connection between art and the world around them.

A+ Answer Key

The content connects learning to **real-life situations,** helping students understand key concepts and apply their knowledge in daily life.

1. Roles and Duties of Youth to the Society and the Nation

1.1 Importance of Youth

Youth is an important group of Thai population that the country needs to rely on. If youths are of good quality, the country will progress and easily develop. Thai society expects youth to be quality citizens with knowledge, abilities, wisdom, virtue, and ethics. Also, they should be self-disciplined and responsible, and not behave badly or harmfully to the society.

Since youth is an important power of the country, both in the present and in the future, they have to study and learn in many fields and conduct themselves properly together with virtue and ethics, so they will be able to take responsibilities for their works and for the benefit of oneself and the country, and become a good citizen to help develop the country later on.

As the citizens of the country, youth need to be trained to have a public mind which is fundamentally preferable. Public mind means a conscience in taking part and knowing their rights, freedoms, their own duties, and the duties of others living in the same society. They should willingly take part in social activities, especially public activities hosted by their own community or society.

Did you know?

Being a Public - minded Person

Public mind can be categorized into three characteristics as follows:

1. Knowing the *value* of things in terms of social value or the value of public things owned by all members of the society without discrediting or destroying them
2. Expressing one's participation in the society by using rights, freedoms, and responsibilities
3. Expressing and conducting oneself to protect the interests of the society and the nation

Marginal notes extend students' knowledge and support clearer understanding by helping them visualize concepts more easily.

Reflective questions help students connect concepts to real-world contexts, review their learning, and consolidate understanding.

The series includes **activities** that encourage students to explore topics further, conduct additional research, and apply knowledge through meaningful practice.

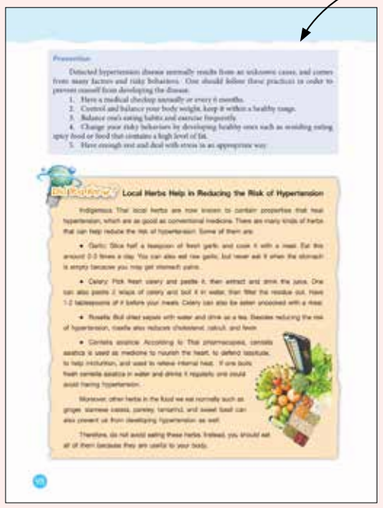

Unit 1 Questions

1. What are the main characteristics and duties of Thai citizen?
2. As a Thai citizen, do you think what you can do to help our society and nation?
3. What are the important characteristics of a public-minded person and how to encourage youth to have a public mind?
4. What would be the effect on society if its members respect the rights and liberties of each other?
5. How can you conduct yourself as a good citizen that respects others' rights and liberties?

Let's Do More!

Activity 1	*Record your behaviors as a quality citizen for one week and then make a summary before handing it in to the teacher.*
Activity 2	*Observe people around you that are considered as a role model of good citizen, for example, those who obey the laws and regulations, those who hold to morality and ethics, those who love the nation, those who pay well respect to the religion and monarch, those who live their lives sufficiently, and those who are grateful to parents. Then, take notes on what they do and the good consequences from doing it before discussing with others in the classroom.*
Activity 3	*Participate in "The Tree of Goodness Activity" by designing the tree together. Each of you will then write down "duty of Thai citizen" on a tree leaf before posting it up on the tree. Then, a volunteer will be chosen to read 5-10 leaves and discuss the guidelines and consequences of conducting them.*
Activity 4	*Arrange in groups. Each group then gives 1-2 examples on the 12 core values of Thai people and discuss the guidelines for practicing together with the pros and cons from following these core values, which affecting yourself and the nation.*

Relevant content and an easy-to-read layout help students understand key concepts clearly while developing their reading skills.

Prevention

Detected hypertension disease normally results from an unknown cause, and comes from many factors and risky behaviors. One should follow these practices in order to prevent oneself from developing the disease.

1. Have a medical checkup annually or every 6 months.
2. Control and balance your body weight, keep it within a healthy range.
3. Balance one's eating habits and exercise frequently.
4. Change your risky behaviors by developing healthy ones such as avoiding eating spicy food or food that contains a high level of fat.
5. Have enough rest and deal with stress in an appropriate way.

Did you know? **Local Herbs Help in Reducing the Risk of Hypertension**

Indigenous Thai local herbs are now known to contain properties that treat hypertension, which are as good as conventional medicine. There are many kinds of herbs that can help reduce the risk of hypertension. Some of them are

- Garlic: Slice half a teaspoon of fresh garlic and cook it with a meal. Eat this around 2-3 times a day. You can also eat raw garlic, but never eat it when the stomach is empty because you may get stomach pains.
- Celery: Pick fresh celery and pestle it, then extract and drink the juice. One can also pestle 2 ways of celery and boil it in water, then filter the residue out. Have 1-2 tablespoons of it before your meals. Celery can also be eaten processed with a meal.
- Roselle: Boil dried sepals with water and drink up a tea. Besides reducing the risk of hypertension, roselle also reduces cholesterol, calcium and fevers.
- Centella asiatica: According to Thai pharmacopoeia, centella asiatica is used as medicine to nourish the heart, to defend toxicitate, to help micturition, and used to relieve internal heat. It one suffs fresh centella asiatica in water and drinks it regularly one could avoid having hypertension.

Moreover, other herbs in the food we eat normally such as ginger, stemless cassia, parsley, tamarind, and sweet basil can also prevent us from developing hypertension as well.

Therefore, do not avoid eating these herbs. Instead, you should eat all of them because they are useful to your body.

Additional content boxes provide helpful explanations that extend knowledge and deepen understanding.

Real-life application activities connect learning to everyday situations and help students develop practical life skills.

Exercises help students review what they have learned and assess their understanding step by step.

Unit 9

Exercises

1. Write down the effect of alcohol consumption on health into the given diagram.

Introducing Cambridge Primary

Cambridge Primary takes learners on an exciting educational journey, helping them to become confident, responsible, reflective, innovative and engaged. It is typically for students aged 5 to 11 years.

By offering Cambridge Primary, you can provide a broad and balanced education for your learners, helping them to thrive throughout their schooling, work and life.

We believe that assessment should both prove and improve students' learning, giving them focus, pace and challenge. We organise our primary assessments in a way that maximises time for teaching and learning.

"Cambridge Primary is a very flexible curriculum. It is not restrictive. I can bring local and international examples into my class, and it works very well with my students."

Doaa Hamdy El Shaar, *Teacher, International School of Elite Education, Egypt*

Cambridge Global English Starters

Kathryn Harper, Gabrielle Pritchard and Annie Altamrino

Cambridge Global English Starters is a fun course to get your learners ready to study in English. Written by experts in pre-primary education, this series fulfils the requests of teachers by helping to develop the skills children need to begin learning in English at Grade 1. Suitable for learners going on to the Cambridge Primary or IB Primary Years Programme, you can use it either in Kindergarten or at the start of Grade 1.

Teacher's Resource

Your essential companion to the course, the teacher's resource includes full guidance and lesson plans, along with specific assessment support and suggested questions to get learners talking. Includes access to a digital version of the resource as standard.

Learner's books

Each book covers one term and includes three units. Every unit includes a story, from traditional tales such as Goldilocks, to stories in familiar settings like the classroom. Available as a digital version to support remote learning.

Activity books

These write-in activity books provide extra activities linked to the learner's book theme and objectives.

Fun with letters and sounds books

These write-in books focus on recognising, saying and writing letters: essential skills for learning to read and write confidently.

Digital Classroom

Digital Classroom gives you access to everything you need to bring your lessons to life.

This screenshot is from Global English Starters Digital Classroom

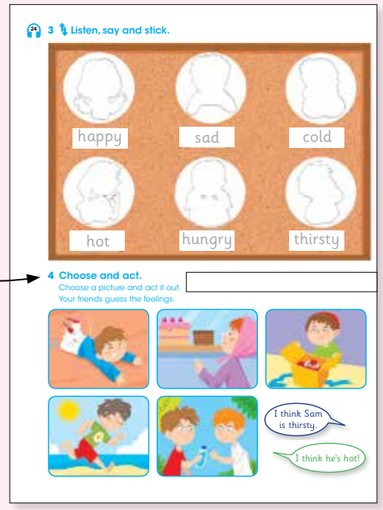

A big question introduces the enquiry-led learning approach, encouraging learners to reflect on questions and examine ideas.

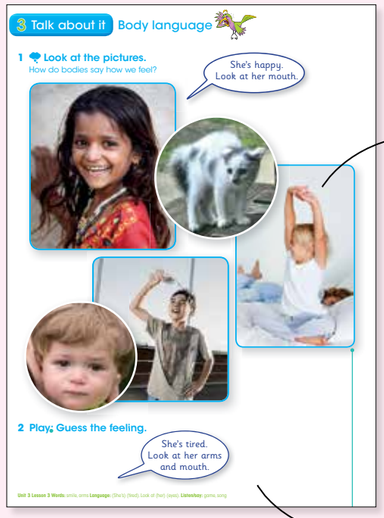

These pages are from Global English Starters Learner's Book A

Packed with games to make learning in English fun!.

Learner's Book B	Activity Book B	Fun with Letters and Sounds B	
Learner's Book C	Activity Book C	Fun with Letters and Sounds C	

A starter activity revises key vocabulary for the unit.

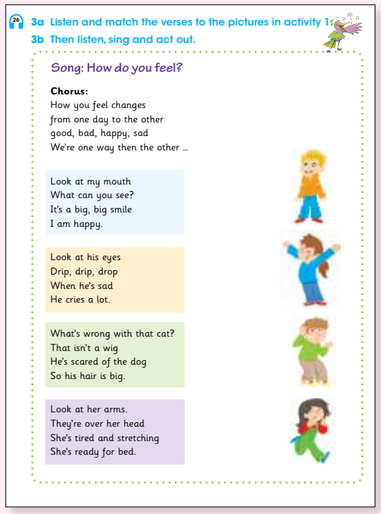

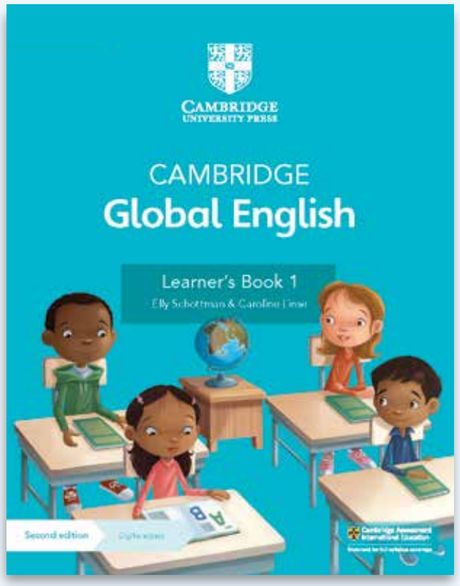

These pages are from Global English Starters Learner's Book A

Images provide a stimulus for children to talk.

Fun paired and group games provide opportunities to practise new vocabulary and structure.

Songs and chants are fun and motivating and allow language to be reinforced in a natural way.

Cambridge Global English

Elly Schottman, Caroline Linse, Kathryn Harper

With international cross-curricular topics, from adventures and space to sport and nature, the series helps your class develop the skills to study across the curriculum in English. Developed resources by subject experts take your learners from A1 to B1/B2 CEFR level.

Learner's Book

Packed with literature, oracy and games, the learner's books help your class use English confidently. Step-by-step writing activities with models support them to develop their writing, while tip boxes help with language and skills learning strategies. Each unit ends with a 'Project Challenge' where learners work together on cross-curricular projects like a comic strip or presentation, developing collaboration and critical thinking skills.

Writing and oracy spreads in each unit help learners develop their productive skills.

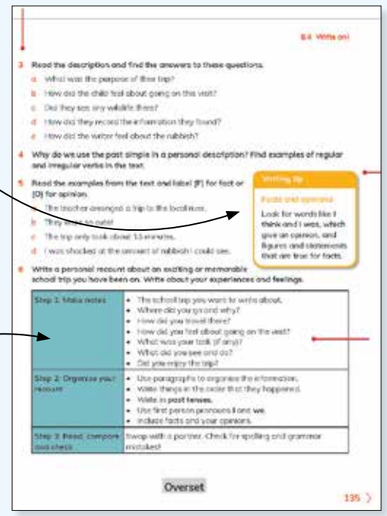

Opportunities for grammar practice in the context of the activity help develop accuracy.

There pages are from Cambridge Global English Learner Book 4

Activities to develop critical thinking skills are included throughout.

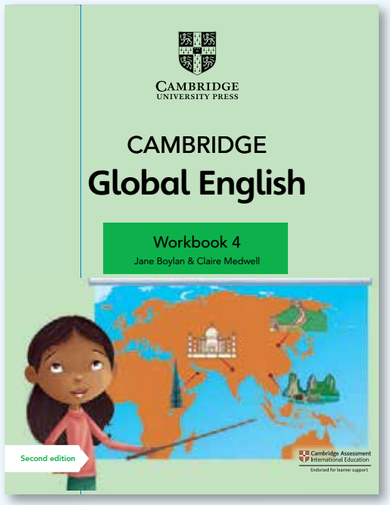

A process writing model helps learners develop confidence.

Workbook

Activities including puzzles and quizzes help your class practise and consolidate what they have learnt, providing support for the reading, writing and use of English strands of the curriculum framework. Ideal for use in the classroom or for homework.

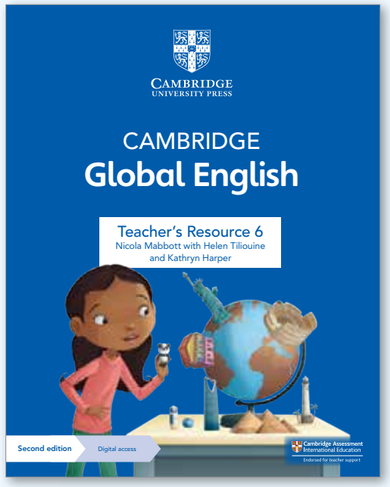

- Process writing pages consolidate your learners' knowledge of text types including literature
- More grammar practice. Three-tiered grammar exercises : Focus, practice and challenge.
- Write-in for ease of use

Teacher's Resource

Provide everything you need to plan and run your lessons, including

- Starter activities and additional lesson ideas not included in the learner's books
- Answers audio files and wordlists for all activities
- Photocopiable games and activities in the accompanying digital resource.
- Downloadable progress and unit tests, with answers, provide ready-made assessment opportunitie
- The 'Teaching skills focus' helps you develop your own teaching style and bring active learning, assessment for learning and differentiation into your classroom
- Common misconceptions' highlight areas that learners frequently find challenging and show you how to overcome them
- 'Learning plans' show you how your lessons link to the Cambridge Primary English as a Second Language curriculum framework

Digital Classroom

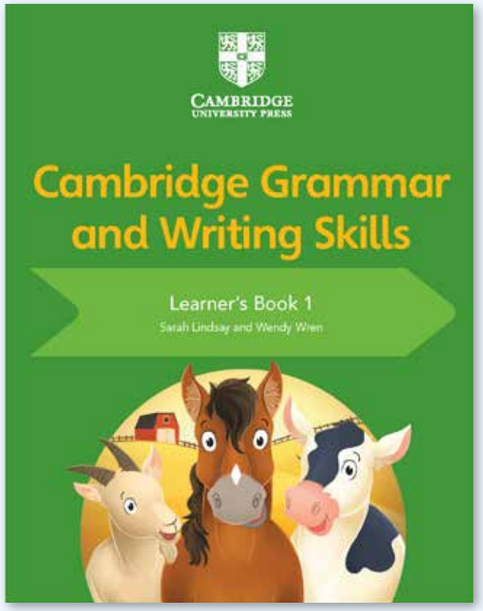

With on-screen versions of the learner's book and workbook, plus video, grammar presentations and interactive activities, our Digital Classroom resources bring English to life! Zoom, highlight or annotate to emphasise important points.

- Help learners develop their grammar with presentations and interactive activities
- Save time with ready-made videos linked to each topic, with accompanying questions
- Quickly and easily display answers on screen

Curriculum support

This new series supports you and your learners through the new Cambridge Primary English as a Second Language curriculum framework (0057) Find out more about how our resources support you and your learners at cambridge.org/primary

Cambridge Grammar and Writing Skills

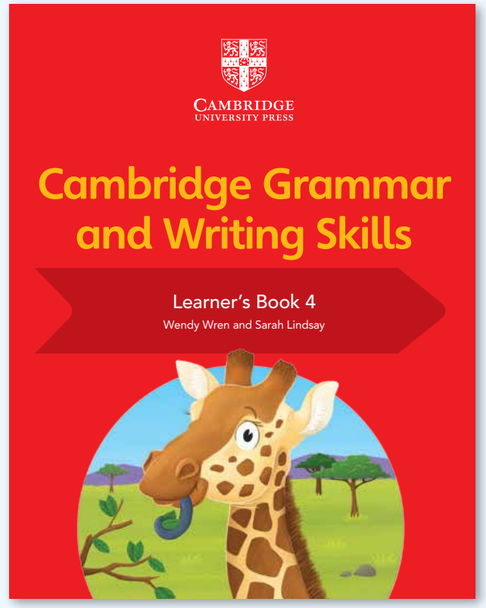

Sarah Lindsay and Wendy Wren

Watch your learners grow in confidence as they develop their writing skills. They'll write a newspaper article, adapt a myth and even create an advert for their favourite breakfast cereal! From haikus, fairy tales and plays to biographies, recounts and instructions, this series gives your learners the knowledge and skills to tackle a range of writing types.

Learner's Book

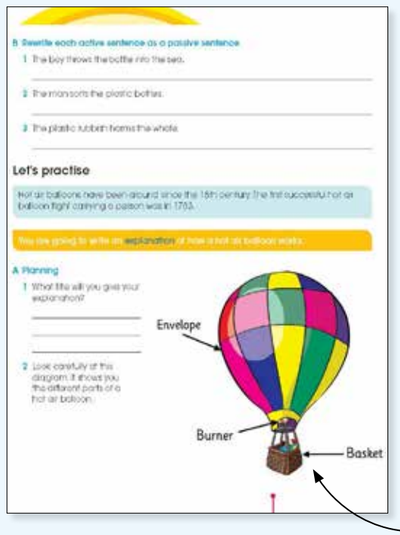

Provides activities for learners to practise and extend their creative writing skills.

Students bring together everything they have learned to create their own text, with planning support including story maps and prompts. This section is called 'Guided writing' in Stages 7-9.

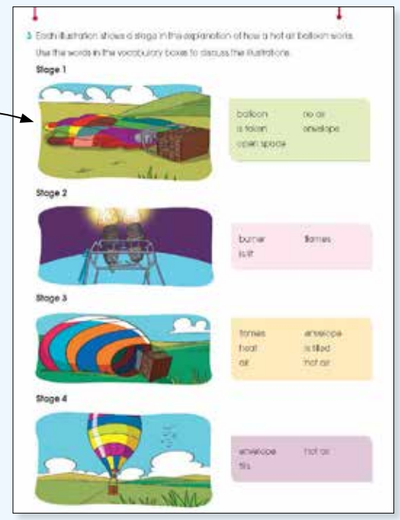

A range of planning tools, including mind maps, helps learners develop their writing.

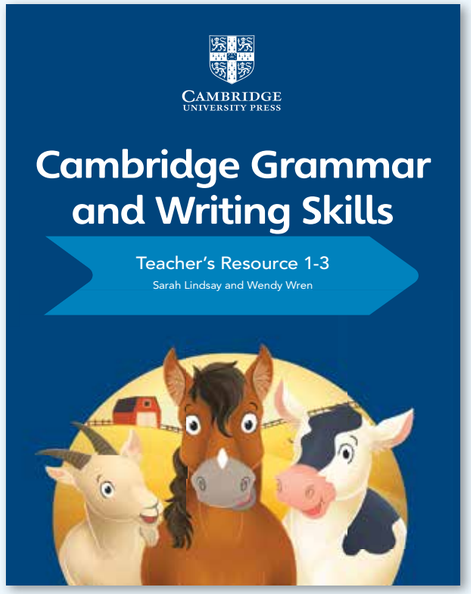

There pages are from Cambridge Grammar and Writing Skill Learner's Book 6

Students should be encouraged to work together during the ideas and planning stage.

Words and phrases to help learners with their writing.

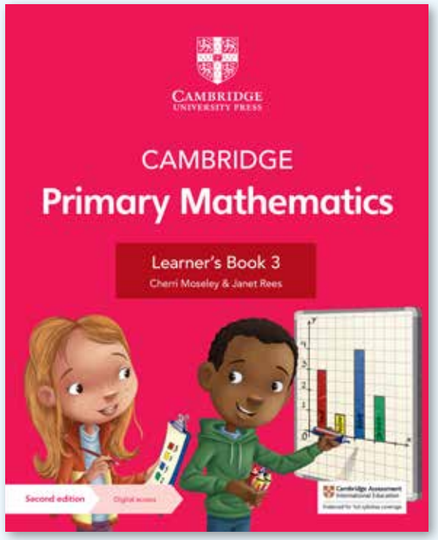

Teacher's Resource

Cambridge Primary Mathematics

Cherri Moseley, Janet Rees, Emma Low and Mary Wood

Whether they are creating a house with 3D shapes or using recipes to understand fractions, this series helps your learners develop mathematical thinking skills.

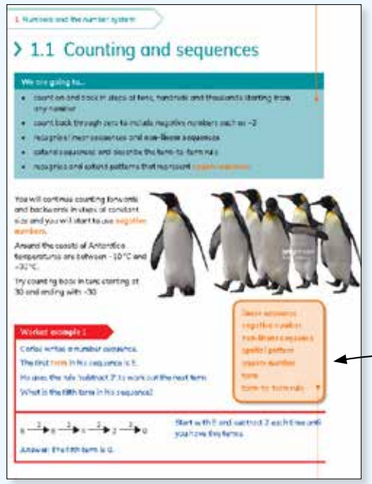

Learner's Book

Learners will be fully supported with worked examples and plenty of practice exercises to help them build their confidence with a range of maths concepts including handling data, algebra and probability. We've also worked with the team at NRICH to include projects that provide opportunities for deeper investigation of mathematical ideas and concepts, such as exploring negative numbers through water levels. With key word boxes, clear diagrams and supporting illustrations, the resources are accessible for all learners.

The 'Getting started' feature at the start of each unit gets your learners thinking and talking about what they already know
- Help your learners to think and work mathematically with clearly identified questions and activities throughout each unit
- 'Think like a mathematician' provides learners with investigation activities linked to the skills they are developing
- 'Look what I can do!' statements in each section and a 'Check your progress' exercise at the end of each unit help your learners reflect on what they have learnt
- Answers for all activities can be found in the accompanying teacher's resource

Key terms highlighted in the context of use.

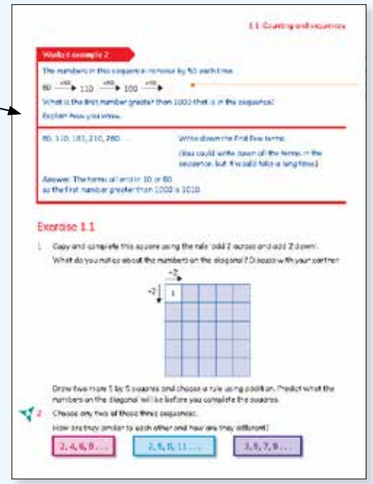

Clear information on what learners will cover.

These pages are from Cambridge Primary Mathematics Learner's Book 4

Worked examples to help students see how to apply new skills.

Key vocabulary terms for learners to become familiar with.

Workbook

Providing practice consolidation Mathematics, the workbooks are packed with activities, including puzzles, ordering, and matching. Specific questions focus on developing learners' Challenge exercises provide clear progression through each topic, helping learners skills for Thinking and Working Mathematically, while three-tiered Focus, Practice and Challenge exercises provide clear progression through each topic. The workbooks are ideal for use in the classroom or for homework.
- Three-tiered exercises in every unit get progressively more challenging to help students track their own learning
- Varied question types keep learners interested
- Covers all skills in the learner's book
- Answer for all questions can be found in the accompanying teacher's resource

Teacher's Resource

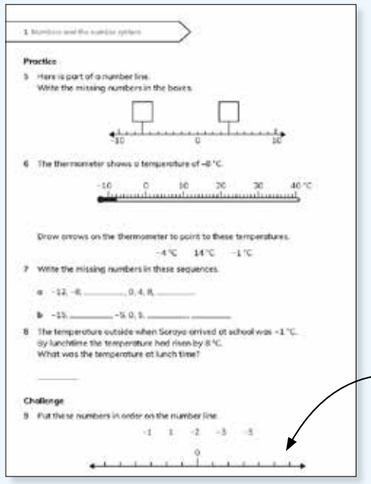

Provide everything you need to plan and run your lessons, including
- The 'Background knowledge' section gives you key information on each unit, so you have the detail you need to teach confidently
- The 'Teaching skills Additional focus' helps you develop your own teaching style and bring active learning assessment for learning and differentiation into your classroom

Three-tiered approach, Focus, Practice and Challenge, gives learners opportunity to consolidate and build on their learning.

Digital Classroom

Engage your learners with on-screen versions of the learner's book and workbook, video, animations and slideshows as well as interactive activities.

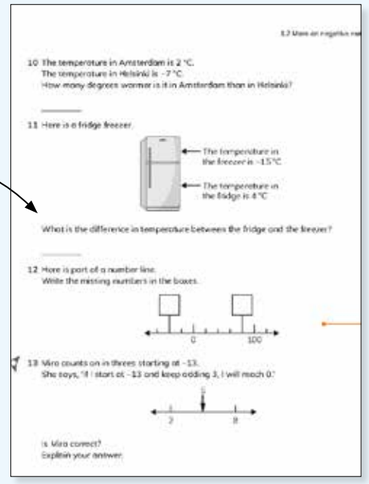

- Zoom, highlight or annotate to emphasise important points
- Save time with ready-made videos to introduce your learners to concepts like tessellation
- Interactive on-screen manipulatives reinforce key concepts such as calculating area
- Quickly and easily display answers on screen
- Guidance on selected Thinking and Working Mathematically questions is assessments provided for each section, helping you to develop these skills in your learners
- 'Common misconceptions' highlight areas that learners frequently find challenging and show you how to overcome them

These pages are from Cambridge Primary Mathematics Workbook 4

Activities which focus on Thinking and Working Mathematically competencies are clearly identified.

Links to the unit focus in the learner's Book.

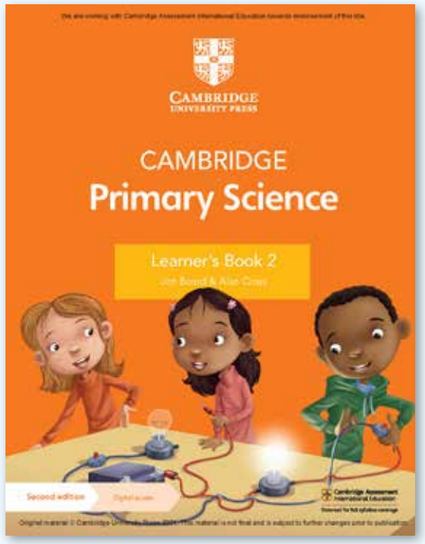

Curriculum support

This series supports you and your learners through the new Cambridge Primary Mathematics curriculum framework (0096).

Cambridge Primary Science

Jon Board, Alan Cross, Fiona Baxter, Liz Dilley and Sally Burbeary

From finding out if water conduct electricity, to discover how energy is transferred, Cambridge Primary Science gets your learner think like scientists

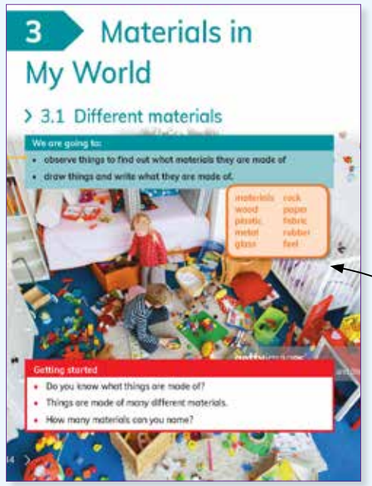

Learner's Book

Our learner's Books include practical activities to develop learners' scientific enquiry skills. They'll find out how our muscles work, discover the difference between liquids and solids, and what cause volcanos.

Each unit ends with a project, like creating presentation on worm farms, so help learners bring together what they have learnt and understand how the topic relate to the real world.

With Vocabulary boxes, clear diagrams and supporting illustrations, the course makes science accessible for learners with English as a second language.

- Get your learners thinking and talking about what they already know with 'Getting Started' boxes at the start of each topic
- Help your learners think and work scientifically with practical tasks in the 'Think like a scientist' feature
- Topic throughout the series support the new earth and space strand of the curriculum framework
- Help your students reflect on what they have learnt with 'Reflections' and 'Look what I can do!' sections at the end of each topic
- Answers for all activities can be found in the accompanying teacher's resource

These pages are from Cambridge Primary Science Learner's Book Stage 1

Key vocabulary is identified in the text.

Learners are clear on what they will be covering in the lesson.

Workbook

Encourage your learners to think and work scientifically and provide opportunities to consolidate their learning. The workbook includes Focus, Practice and Challenge exercises to provide clear progression through each topic, helping learner to see what they have achieved. The drawing and writing activities give learners more experience with scientific vocabulary, which help develop their language skills. The exercises and activities are ideal for use in the classroom or for homework

- Active learning opportunity to help learners apply their knowledge to new contexts
- Three-tiers excercises in every topic to help students track their own learning
- Varied exercise types keep learners interested
- Answers to all activities can be found in the accompanying teacher's resources

Teacher's Resource

Provide everything you need to plan and run your lessons, including

- Guidance on the key teaching approaches and how to use them in your classroom
- The 'Background knowledge' section gives you key information on each unit so you have the detail you need to teach confidently
- The 'Teaching Skill focus' helps you develop your own teaching style and bring active learning, assessment for learning and differentiation into your classroom with confidence

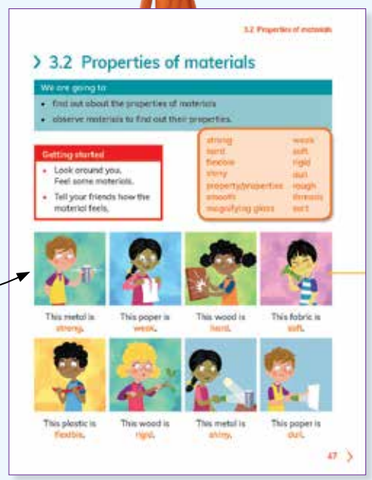

Activities throughout help your learners develop their scientific enquiry skills.

These pages are from Cambridge Primary Science Workbook 4

Diagrams and illustrations are included to help learners understand.

Opportunities for students to self-assess their learning, helping to develop reflection skills.

Digital Classroom

Our Digital Classroom resources help your learners think like scientists, with' Cambridge Science Investigators' videos which include experiments like melting points and plastic strength. You'll also find digital versions of the learner's books and workbooks and interactive activities

- Zoom, highlight or annotate to emphasise important points
- Videos or animations give you ready made materials linked to each topic, which accompanying questions
- Quickly and easily display answers on screen
- 'Common misconceptions' highlight areas that learners frequently find challenging and show you how to overcome them
- Downloadable tests, with answers, provide ready-made assessment opportunities
